92-03404/

CONSOLIDATION OF CANADIAN SPILL REPORTING PROVISIONS

This document is a consolidation of existing spill reporting provisions extracted from Canadian legislation. Parts I and II cover federal and provincial reporting provisions, respectively.

The consolidation has been prepared for convenience of reference only. Spill reporting excerpts have been reproduced without modification. Of all the sections, subsections and paragraphs referred to in the text, only those relating to spill reporting have been included. It should be noted that certain schedules and tables have not been reproduced due to their length or their irrelevance to the reporting provisions.

Users of this unofficial consolidation are cautioned that it has no legislative sanction. For purposes of interpretation and application of the law, users must consult the official legislative documents.

Any knowledge of other existing spill reporting provisions which have not yet been incorporated into this consolidation should be drawn to the attention of

Prevention Officer

FEDERAL

ACT	DEPARTMENT	REPORTING PROVISION
ARCTIC WATERS POLLUTION PREVENTION ACT	Indian and Northern Affairs Canada	**Interpretation.** 2. In this Act, "waste" means (a) any substance that, if added to any water, would degrade or alter or form part of a process of degredation or alteration of the quality of that water to an extent that is detrimental to their use by man or by any animal, fish or plant that is useful to man, and (b) any water that contains a substance in such a quantity or concentration, or that has been so treated, processed or changed, by heat or other means, from a natural state that it would, if added to any other water, degrade or alter or form part of a process of degredation or alteration of the quality of that water to the extent described in paragraph (a), and without limiting the generality of the foregoing, includes anything that, for the purposes of the Canada Water Act, is deemed to be waste. **Deposit of Waste.** **4. Prohibition.** (1) Except as authorized by regulations made under this section, no person or ship shall deposit or permit the deposit of waste of any type in the arctic waters or in any place on the mainland or islands of the Canadian arctic under any conditions where the waste or any other waste that results from the deposit of the waste may enter the arctic waters. **5. Report of deposit of waste or danger thereof.** (1) Any person who (a) has deposited waste in contravention of subsection 4(1), or (b) carries on any undertaking on the mainland or islands of the Canadian arctic or in the arctic waters that, by reason of any accident or other occurrence, is in danger of causing any deposit of waste described in that subsection otherwise than a type, in a quantity and under conditions prescribed by regulations made under section 4, shall forthwith report the deposit of waste or the accident or other occurrence to a pollution prevention officer at such location and in such manner as may be prescribed by the Governor in Council. (2) The master of any ship that has deposited waste in contravention of subsection 4(1), or that is in distress and for that reason is in danger of causing any deposit of waste described in that subsection otherwise than of a type, in a quantity and under conditions prescribed by regulations made under section 4, shall forthwith report the deposit of waste or the condition of distress to a pollution prevention officer at such location and in such manner as may be prescribed by the Governor in Council. R.S.,c.2(1st Supp.),s.5.

CANADIAN SPILL REPORTING PROVISIONS

FEDERAL

ACT	DEPARTMENT	REPORTING PROVISION
ATOMIC ENERGY CONTROL ACT	Atomic Energy Control Board	**2. Interpretation.** In this Act, "prescribed substances" means uranium, thorium, plutonium, neptunian, deuterium, their respective derivatives and compounds and such other substances as the Board may by regulation designate as being capable of releasing atomic energy or as being requisite for the production, use or application of atomic energy; **9. Regulations.** The Board may, with the approval of the Governor in Council, make regulations (b) for developing, controlling, supervising and licensing the production, application and use of atomic energy; (c) respecting mining and prospecting for prescribed substances; (d) regulating the production, import, export, transportation, refining, possession, ownership, use or sale of prescribed substances and any other things that in the opinion of the Board may be used for the production, use or application of atomic energy;
Atomic Energy Control Regulations		**21. Reporting Occurrence** (1) Every person (a) in charge of a nuclear facility, (b) in charge of a device or of equipment containing radioactive prescribed substances, or (c) in possession of a radioactive prescribed substance shall, in the event of an occurrence that results or is likely to result in the receipt by any person of a dose of ionizing radiation or of an exposure to radon daughters in excess of any dose or exposure specified in respect of such person in Schedule II, (d) report such occurrence within 24 hours to the inspector appointed for the place or area in which the occurrence has taken place; (e) as soon as possible after the occurrence, send a complete report of such occurrence to the Board, to the inspector referred to in paragraph (d) and to the person or committee appointed pursuant to section 16 to advise on radiation safety in respect of the place or area in which the occurrence has taken place; and

CANADIAN SPILL REPORTING PROVISIONS

FEDERAL

ACT	DEPARTMENT	REPORTING PROVISION
ATOMIC ENERGY CONTROL ACT (CONT'D)	Atomic Energy Control Board	
Atomic Energy Control Regulations (Cont'd)		(f) if the occurrence has resulted in the receipt by any person of a dose of ionizing radiation or of an exposure to radon daughters in excess of any dose or exposure specified in Schedule II, send a copy of the report referred to in paragraph (e) to the medical advisor appointed for the place or area in which the occurrence has taken place. (2) In the event of any occurrence described in subsection (1), the person in charge of a nuclear facility or the equipment containing the prescribed substance or the person in possession of the prescribed substance, as the case may be, shall (a) immediately take all appropriate measures to prevent or minimize exposure of any person to ionizing radiation or radon daughters resulting from such occurrence; and (b) comply with any instructions that may be given by the inspector appointed for the place or area in which the occurrence has taken place.
Transport Packaging of Radioactive Materials Regulations		3.1 General. No person shall transport, or cause to be transported, any radioactive material except in accordance with the requirements of these regulations and the Transportation of Dangerous Goods Regulations. 18. Receipt of Packages. A person to whom radioactive material is transported in a package shall as soon as practicable on receipt of the package and before opening it (a) examine it for evidence of damage or leakage of the contents; (b) if there appears to be damage to the package or leakage of the contents, measure (i) the radiation level at the surface of the package, (ii) where the result of the measurement made pursuant to subparagraph (i) exceeds 2mSv/h, the radiation level at 1 m from the surface of the package, and (iii) the activity of any non-fixed radioactive material on the external surface of the package (c) determine whether the measurements referred to in paragraph (b) are within the applicable limits imposed by these Regulations taking into account the safety marks borne by the package and whether it was exclusive use;

ACT	DEPARTMENT	REPORTING PROVISION
ATOMIC ENERGY CONTROL ACT (CONT'D)	Atomic Energy Control Board	
Transport Packaging of Radioactive Materials Regulations (Cont'd)		(d) notify the Board and the person who caused the radioactive material to be transported (i) forthwith upon discovery of any crack, split, wasting of material due to corrosion or other defect which calls into question the integrity or soundness of the packaging, (ii) forthwith where the radiation level is determined to exceed 10 mSv/h at the surface of the package or 200 µSv/h at 1 m from the surface of the package, (iii) within five days, excluding holidays, where the radiation level at the surface or at 1 m from the surface of the package, or the activity of any non-fixed radioactive material on the external surface of the package, was determined to exceed the applicable limits imposed by these regulations; (e) provide, in respect of any notification made pursuant to paragraph (d), full particulars of the packaging and the manner in which the package failed to satisfy any applicable requirements of these regulations; and (f) keep records of all observations made pursuant to paragraphs (a) and (b) and retain those records in a form suitable for inspection for a period of at least two years and if requested to do so, provide the Board or an inspector appointed under the Atomic Energy Control Regulations with full access to these records.
Uranium and Thorium Mining Regulations		2. Interpretation. In these Regulations, "waste" means a material or substance that is of no further use to the mining facility and that may require management in a waste management system; 11. Removal Licence (1) An application for a licence to remove uranium or thorium at a removal site shall include the following information: (g) the procedures to be followed in the event of accidental or unscheduled releases of radioactive and non-radioactive contaminants from or within the removal site; and (h) a description of the equipment and methods to be used to monitor the release of radioactive and non-radioactive contaminants from the removal site.

ACT	DEPARTMENT	REPORTING PROVISION
ATOMIC ENERGY CONTROL ACT (CONT'D)	Atomic Energy Control Board	
Uranium and Thorium Mining Regulations (Cont'd)		(2) A licence referred to in subsection (1) may set out the term for which the licence is valid and may contain such other terms and conditions as the Board or a designated officer considers necessary in the interests of health and safety, security and protection of the environment and, without limiting the generality of the foregoing, may contain conditions respecting (a) any information referred to in subsection (1); (b) the maximum quantity and concentration of radioactive and non-radioactive contaminants that may be released into the environment from the removal site; (c) the monitoring programs to be established at the removal site; and (d) the measures to be taken to prevent, reduce or control radiation hazards arising from the activities at the removal site. **22. Code of Practice.** (1) Every licensee (a) excavating uranium or thorium at an excavation site, (b) constructing a mine or operating a mine or mill, or (c) decommissioning an excavation site, mine or mill shall prepare and submit to the Board and to the representative a code of practice for approval pursuant to subsection (4). (2) A code of practice submitted pursuant to subsection (1) shall, where applicable, specify the action level and the corrective actions that the licensee will carry out in the event that (a) any concentration of a radioactive prescribed substance in the air or any radiation level at any work place exceeds any action level in the code of practice; (b) any person receives a dose of radiation that exceeds any action level specified in the code of practice; and (c) any result from a bioassay program exceeds any action level specified in the code of practice.

FEDERAL

ACT	DEPARTMENT	REPORTING PROVISION
ATOMIC ENERGY CONTROL ACT (CONT'D)	Atomic Energy Control Board	
Uranium and Thorium Mining Regulations (Cont'd)		**33. Loss, Escape and Release of Ore.** (1) Every licensee shall establish written procedures approved by the Board or a designated officer to be followed in the event of any significant loss, escape or release of ore from the mining facility of the licensee or during transport from any mine under the licensee's control to a mill. (2) Every licensee shall forthwith take all remedial measures necessary, including implementing the procedures established pursuant to subsection (1) on the occurrence of any significant loss, escape or release of ore from the mining facility of the licensee or during transport from any mine under the licensee's control to a mill. **35. Accidental or Unscheduled Release of Wastes.** Every licensee shall, on the occurrence of any significant accidental or unscheduled release of waste from or within a mining facility under his control, forthwith (a) take all remedial measures necessary, including implementing any procedures established pursuant to a condition of licence; and (b) notify the Board of the event and any actions taken and intended to be taken subsequent to the event. **62. Reports and Records.** (1) Every licensee shall forthwith report to the Board (a) any accidental or unscheduled release of radioactive and non-radioactive contaminants from or within the mining facility that could constitute or contribute to a significant risk to health and safety or have a significant effect on the environment; (b) any loss or theft of uranium, thorium or concentrate; (c) attempted or actual breaches of security measures, serious threats respecting property and attempted or actual acts of sabotage at the mining facility; and (d) information revealing abnormal degredation, weakening or incipient failure of any component or system, the failure of which could constitute or contribute to a significant risk to health and safety or have a significant effect on the environment. (2) A copy of any reports made pursuant to paragraphs (1)(a) and (d) pertaining to the health and safety of workers shall be provided to the representative.

CANADIAN SPILL REPORTING PROVISIONS

FEDERAL

ACT	DEPARTMENT	REPORTING PROVISION
CANADA LABOUR CODE	Ministry of Labour	
	PART II	122. Interpretation.

(1)In this Part,

"hazardous substance" includes a controlled product and a chemical, biological or physical agent that, by reason of a property that the agent possesses, is hazardous to the safety or health of a person exposed to it;

124. General Duty of employer.

Every employer shall ensure that the safety and health at work of every person employed by the employer is protected.

125. Specific Duties of Employer.

Without restricting the generality of section 124, every employer shall, in respect of every work place controlled by the employer,

(c) investigate, record and report in the manner and to the authorities as prescribed all accidents, occupational diseases and other hazardous occurrences known to the employer;

(d) post at a place accessible to every employee and at every place directed by a safety officer,

i) a copy of this Part,
ii) a statement of the employer's general policy concerning the safety and health at work of employees, and
iii) such other printed material related to safety and health as may be directed by a safety officer or as is prescribed;

(e) keep and maintain in prescribed form and manner prescribed safety and health records;

125.1 Further specific duties of employer.

Without restricting the generality of section 124 or limiting the duties of an employer under section 125 but subject to such exceptions as may be prescribed, every employer shall, in respect of every work place controlled by the employer,

e) subject to the Hazardous Material Information Review Act, make available, in the manner prescribed, to each of his employees a material safety sheet, with respect to each controlled product in the work place, that discloses the following information, namely,

i) where the controlled product is a pure substance, the chemical identity of the controlled product and, where the controlled product is not a pure substance, the chemical identity of any ingredient thereof that is a controlled product and the concentration of that ingredient,

CANADIAN SPILL REPORTING PROVISIONS

FEDERAL

ACT	DEPARTMENT	REPORTING PROVISION
CANADA LABOUR CODE (CONT'D)	Ministry of Labour	
	PART II (Cont'd)	ii) where the controlled product contains an ingredient that is included in the Ingredient Disclosure List and the ingredient is in a concentration that is equal to or greater than the concentration specified in the Ingredient Disclosure List for that ingredient, the chemical identity and concentration of that ingredient, iii) the chemical identity of any ingredient thereof that the employer believes on reasonable grounds may be harmful to an employee and the concentration of that ingredient, iv) the chemical identity of any ingredient thereof the toxicological properties of which are not known to the employer and the concentration of that ingredient, and v) such other information with respect to the controlled product as may be prescribed. 125.2 **Employer to provide information in emergency.** (1) An employer shall, in respect of any controlled product in a work place controlled by him, provide, as soon as is practicable in the circumstances, any information referred to in paragraph 125.1(e) that is in the employer's possession to any physician or other prescribed medical profession who requests that information for the purpose of making a medical diagnosis of, or rendering medical treatment to, an employee in an emergency. 126. **Duties of Employee.** (1) While at work, every employee shall (g) report to the employer any thing or circumstance in a work place that is likely to be hazardous to the safety or health of the employee, the other employees or other persons granted access to the work place by the employer; (h) report in the manner prescribed every accident or other occurrence arising in the course of or in connection with the employee's work that has caused injury to the employee or to any person; and (i) comply with every oral or written direction of a safety officer concerning the safety and health of employees. (2) Nothing in subsection (1) relieves an employer from any duty imposed on the employer under this Part.

FEDERAL

ACT	DEPARTMENT	REPORTING PROVISION
CANADA-NEWFOUNDLAND ATLANTIC ACCORD IMPLEMENTATION ACT	Energy, Mines and Resources (Canada Oil and Gas Lands Administration)	**160. Definitions and regulations.** (1) In sections 161 to 165, "spill" means a discharge, emission or escape of petroleum other than one that is authorized pursuant to subsection (4) or any other act of Parliament that constitutes a discharge of a pollutant caused by or otherwise attributable to a ship within the meaning of the Canada Shipping Act. (4) Subject to section 7, the Governor in Council may make regulations authorizing the discharge, emission or escape of petroleum of such types, in such quantities, at such locations, under such conditions and by such persons as are specified in the regulations, but Her Majesty in right of Canada has no liability whatever to any person arising out of such authorization. **161. Spills prohibited.** (1) No person shall cause or permit a spill on or from any portion of the offshore area. (2) Where a spill occurs in any portion of the offshore area, any person who at the time of the spill is carrying on any work or activity related to the exploration for or development or production of petroleum in the area of the spill shall, in the manner prescribed by the regulations, report the spill to the Chief Conservation Officer. (3) Every person required to report a spill under subsection (2) shall, as soon as possible, take all reasonable measures consistent with safety and the prevention of pollution to prevent any further spill, to repair or remedy any condition resulting from the spill and to reduce or mitigate any danger to life, health, property or the environment that results or may reasonably be expected to result from the spill.

ACT	DEPARTMENT	REPORTING PROVISION
CANADA-NOVA SCOTIA OFFSHORE PETROLEUM RESOURCES ACCORD IMPLEMENTATION ACT	Energy, Mines and Resources (Canada Oil and Gas Lands Administration)	**165. Petroleum Spills** (1) In sections 166 to 170 "spills" means a discharge, emission or escape of petroleum other than one that is authorized pursuant to subsection (4) or any other Act of Parliament or that constitutes a discharge of a pollutant caused by or otherwise attributable to a ship within the meaning of the Canada Shipping Act. (4) Subject to section 6, the Governor in Council may make regulations authorizing the discharge, emission or escape of petroleum of such types, in such quantities, at such locations, under such conditions and by such persons as are specified in the regulations, but Her Majesty in right of Canada has no liability whatever to any person arising out of such authorization. **166. Spills prohibited.** (1) No person shall cause or permit a spill from any portion of the offshore area. (2) Where a spill occurs in any portion of the offshore area, any person who at the time of the spill is carrying on any work or activity related to the exploration for or development of petroleum in the area of the spill shall, in the manner prescribed by the regulations, report the spill to the Chief Conservation Officer. (3) Every person required to report a spill under subsection (2) shall, as soon as possible, take all reasonable measures consistent with safety and the prevention of pollution to prevent any further spill, to repair or remedy any condition resulting from the spill and to reduce or mitigate any danger to life, health, property or the environment that results or may reasonably be expected to result from the spill.

ACT	DEPARTMENT	REPORTING PROVISION
CANADA SHIPPING ACT	Transport Canada	
	PART XV Pollution	654. Interpretation. (1) In this Part, "discharge" includes, but not so as to limit its meaning, any spilling, leaking, pumping, pouring, emitting, emptying, throwing or dumping; "pollutant" means (a) any substance that, if added to any waters, would degrade or alter or form part of a process of degradation or alteration of the quality of those waters to an extent that is detrimental to their use by man or by any animal, fish or plant that is useful to man, and (b) any water that contains a substance in such a quantity or concentration, or that has been so treated, processed or changed, by heat or other means, from a natural state that would, if added to any waters, degrade or alter or form part of a process of degradation or alteration of the quality of those waters to an extent that is detrimental to their use by man or by any animal, fish or plant that is useful to man, and without limiting the generality of the foregoing includes oil and any substance or any substance that is part of a class of substances that is prescribed by the Governor in Council, for the purposes of this Part, to be a pollutant; 655. Application of Part. (1) Except where otherwise provided in this Part or in any regulation made thereunder, this Part and any regulations made thereunder apply (a) to all (i) Canadian waters, and (ii) fishing zones of Canada prescribed pursuant to the Territorial Sea and Fishing Zones Act that are not within a shipping safety control zone prescribed pursuant to the Arctic Waters Pollution Prevention Act; and (b) to all ships in waters described in paragraph (a). (2) This Part does not apply to a discharge that constitutes a spill from a ship that is on location and engaged in exploration or drilling for, or production, conservation or processing of, oil or gas in an area described in paragraph 3(a) or (b) of the Oil and Gas Production and Conservation Act, in so far as the discharge emanates from those activities.

ACT	DEPARTMENT	REPORTING PROVISION
CANADA SHIPPING ACT (CONT'D)	Transport Canada	
	Part XV Pollution (Cont'd)	(3) For the purposes of subsection (2), (a) "spill" has the same meaning as in subsection 24(1) of the Oil and Gas Production and Conservation Act; and (b) "oil" and "gas" have the same meaning as in section 2 of that Act. (4) Notwithstanding anything contained therein, a regulation made under this Part does not apply to a Canadian ship in the waters of a country other than Canada where the regulation is inconsistent with a law of that country that, by its terms, applies to the ship when in the waters of that country. 656. Regulations. (1) The Governor in Council may make regulations prohibiting the discharge from ships, except as authorized for the purposes of this Part, of any one or more pollutants specified in the regulations. (2) Notwithstanding any regulation made under subsection (1), a discharge of a pollutant from a ship is permitted if done in accordance with a permit issued under the Ocean Dumping Control Act. 657. (1) The Governor in Council may make regulations (a) respecting the circumstances in which ships shall report discharges or anticipated discharges of pollutants, the manner of making such reports and the persons to whom such reports shall be made; (g) respecting the records to be kept on board a ship i) of any activities on board the ship that result in or may result in the discharge of a pollutant into the water or the atmosphere, ii) of loadings and unloadings of pollutants to or from the ship at any facilities, and iii) where the ship is a Canadian ship, of discharges of pollutants by the ship, which discharges, if made in waters to which this Part applies, would be contrary to any regulation made pursuant to subsection 656(1),
Pollutant Substances Regulations		2. Interpretation. In these Regulations, "discharge" includes, but not so as to limit its meaning, any spilling, leaking, pumping, pouring, emitting, emptying, throwing or dumping;

CANADIAN SPILL REPORTING PROVISIONS

FEDERAL

ACT	DEPARTMENT	REPORTING PROVISION
CANADA SHIPPING ACT (CONT'D)	Transport Canada	
Pollutant Substances Regulations (Cont'd)		**4. Prohibition.** (1) Subject to section 5, no ship shall discharge a pollutant listed in Schedule I from a ship into any of the following waters: (a) Canadian waters south of the sixtieth parallel of north latitude; (b) Canadian waters north of the sixtieth parallel of north latitude that are not within a shipping safety zone prescribed pursuant to the Arctic Waters Pollution Prevention Act; and (c) fishing zones of Canada prescribed pursuant to the Territorial Sea and Fishing Zones Act. (2) Subject to section 5, no person shall discharge or permit the discharge of a pollutant listed in Schedule I from a ship into any of the waters described in paragraphs (1)(a) to (c). 5. A pollutant listed in Schedule I may be discharged from a ship into any of the waters described in paragraphs 4(1)(a) to (c) (a) for the purpose of saving life or preventing the immediate loss of the ship; or (b) when the discharge is due to damage to or leakage from the ship as a result of stranding, collision or foundering and all reasonable precautions have been taken (i) to avoid the stranding, collision or foundering, and (ii) to prevent or minimize the discharge. **6. Reporting of Discharge.** Where a ship (a) discharges a pollutant listed in Schedule I into the waters described in paragraphs 4(1)(a) to (c), or (b) is in danger of discharging or causing a discharge of a pollutant listed in Schedule I into those waters, the master of the ship shall forthwith report the discharge of the pollutant or the danger and the circumstances thereof by radio or by the fastest means available to (c) the pollution prevention officer who, to the best of his knowledge, is nearest to the ship, or (d) a pollution prevention officer at the location listed in Schedule II that is nearest to the ship.

CANADIAN SPILL REPORTING PROVISIONS

FEDERAL

ACT	DEPARTMENT	REPORTING PROVISION
CANADIAN ENVIRONMENTAL PROTECTION ACT	Environment Canada	**3. Interpretation.** (1) In this Act, "release" includes discharge, spray, inject, inoculate, abandon, deposit, spill, leak, seep, pour, emit, empty, throw, dump, place and exhaust;
	PART II Toxic Substances	**11. Interpretation.** For the purposes of this Part, a substance is toxic if it is entering or may enter the environment in a quantity or concentration or under conditions (a) having or that may have an immediate or long-term harmful effect on the environment; (b) constituting or that may constitute a danger to the environment on which human life depends; or (c) constituting or that may constitute a danger in Canada to human life or health. **34. Regulations.** (1) Subject to subsection (3) where an order has been made to add a substance to the List of Toxic Substances in Schedule I, the Governor in Council may, on the recommendations of the Ministers after the federal-provincial advisory committee is provided an opportunity to render its advice under section 6, make regulations with respect to the substance, including regulations providing for or imposing requirements respecting (a) the quantity or concentration of the substance that may be released into the environment either alone or in combination with any other substance from any source or type of source; (b) the places or areas where the substance may be released; (c) the commercial, manufacturing or processing activity in the course of which the substance may be released; (d) the manner in which and conditions under which the substance may be released into the environment, either alone or in combination with any other substance; **36. Release of Toxic Substances.** (1) Where there occurs or is a reasonable likelihood of a release into the environment of a substance specified on the List of Toxic Substances specified in Schedule I in contravention of a regulation made under section 34 or an order made under section 35, any person described in subsection (2) shall, as soon as possible in the circumstances, (a) subject to subsection (4) and any regulations made under paragraph 38(b), report the matter to an inspector or to such person as is designated by regulation;

ACT	DEPARTMENT	REPORTING PROVISION
CANADIAN ENVIRONMENTAL PROTECTION ACT (CONT'D)	Environment Canada	(b) take all reasonable emergency measures consistent with public safety to prevent the release or, if it cannot be prevented, to remedy any dangerous condition or reduce or mitigate any danger to the environment or to human life that results from the release of the substance or may reasonably be expected to result if the substance is released; and (c) make a reasonable effort to notify any member of the public who may be adversely affected by the release or likely release. (2) Subsection (1) applies to any person who (a) owns or has charge of a substance immediately before its initial release or its likely initial release into the environment; or (b) causes or contributes to the initial release or increases the likelihood of the initial release. (3) Where there occurs a release of a substance as described in subsection (1), any person, other than a person described in subsection (2), whose property is affected by the release and who knows that it is a substance specified on the List of Toxic Substances in Schedule I shall, as soon as possible in the circumstances and subject to subsection (4), report the matter to an inspector or to such person as is designated by regulation. (4) Where there are in force, by or under the laws of a province, provisions that the Governor in Council, by regulation, declares to be adequate for dealing with a release described in subsection (1), a report required by paragraph (1)(a) or subsection (3) shall be made to a person designated by the provincial provisions. **37. Voluntary Report.** (1) Where a person has knowledge of the occurrence or reasonable likelihood of a release into the environment of a substance specified in the List of Toxic Substances in Schedule I, but the person is not required to report the matter under this Act, the person may report any information relating to the release or likely release to an inspector or to any person to whom a report may be made under section 36. (2) A person making a report under subsection (1) may request that the person's identity and any information that could reasonably reveal the identity not be released. **38. Regulations.** The Governor in Council may make regulations (a) designating persons for the purposes of paragraph 36(1)(a) and subsection 36(3) and prescribing the form of the report to be made under those provisions and the information to be contained in the report; (b) prescribing the circumstances in which a report is not required to be made under paragraph 36(1)(a); (c) declaring provisions to be adequate for the purposes of subsection 36(4); and (d) generally for carrying out the purposes and provisions of sections 36 and 37.

ACT	DEPARTMENT	REPORTING PROVISION
CANADIAN ENVIRONMENTAL PROTECTION ACT (CONT'D)	Environment Canada	
Vinyl Chloride Release Regulations		6. Malfunction or breakdown report. (1) A report is not required to be made under paragraph 36(1)(a) of the Canadian Environmental Protection Act in any circumstance except in the case of (a) a release of vinyl chloride into the ambient air that exceeds the limits set out in subsection 3(1) and that results in a release of a total of 100 kilograms or more of vinyl chloride into the ambient air; (b) any malfunction or breakdown that results in, i) any release of vinyl chloride from a polymerization reactor into the ambient air, of 100 kilograms or more, ii) any release of vinyl chloride from sources downstream of the slurry stripper or resin stripper, that exceeds the limits set out in paragraph 3(2)(b), (c) or (d), as applicable, for the continuous seven day period, iii) any release of vinyl chloride from process vents into the ambient air, of 100 kilograms or more, iv) any release of vinyl chloride from any source other than a source referred to in sub-paragraph (i) to (iii), except for fugitive emissions where a plan to control fugitive emissions is in place, v) any release of vinyl chloride from any source where the quantity or concentration of vinyl chloride cannot be determined, except for fugitive emissions where a plan to control fugitive emissions is in place. (2) Where a report of a release is provided in any of the circumstances referred to in paragraph (1)(a) and (b), the owner or operator of the vinyl chloride or polyvinyl chloride plant shall, within 20 days of the report, provide a written report to the Minister in the format set out in Schedule I. (3) Subject to subsection (4) the Malfunction or Breakdown Report shall contain information in respect of release measurements conducted in accordance with the Standard Reference Methods for Source Testing: Measurement of Emissions of Vinyl Chloride from Vinyl Chloride and Polyvinyl Chloride Manufacturing Department of the Environment Report EPS-1-AP-77-1 dated June 1979, as amended from time to time, or any other method the results of which can be confirmed by the Standard Reference Method. (4) Where release measurements cannot be conducted as required by subsection (3), the Malfunction or Breakdown report shall contain information regarding the release of vinyl chloride obtained from estimations and calculations made from information available to the owner or the operator of the plant.

ACT	DEPARTMENT	REPORTING PROVISION
CANADIAN ENVIRONMENTAL PROTECTION ACT (CONT'D)	Environment Canada	
Vinyl Chloride Release Regulations (Cont'd)		**7. Compliance Report.** (1) The owner or operator of a vinyl chloride or polyvinyl chloride plant shall, at least once per year, or on a more frequent basis, if requested by the Minister, conduct measurements of the releases referred to in subsections 3(1), (2) and (3) using the method referred to in subsection 3(5) and shall submit the information to the Minister. (2) Where measurements are conducted pursuant to subsection (1), they shall, when requested by the MInister, be conducted in the presence of an inspector or an analyst. (3) The information referred to in subsection (1) shall be submitted to the Minister (a) at the end of each calendar year; and (b) where a request is made, within 90 days from the date of the request. **9. Accidental Releases.** (1) The owner or operator of a vinyl chloride or a polyvinyl chloride plant shall (a) within 60 days of the coming into force of these Regulations, submit to the Minister a program to reduce the potential and impact of accidental releases of vinyl chloride into the ambient air; (b) within 120 days of the coming into force of these Regulations, implement the program referred to in paragraph (a). (2) The program required by subsection (1) shall contain the elements for such a program as described in the Code of Good Operating Practice, referred to in paragraph 8(3)(a). **12. Signing of Reports.** Any report submitted under sections 5 to 11 by a corporation shall be signed by an officer of the corporation authorized to sign the report on its behalf.

ACT	DEPARTMENT	REPORTING PROVISION
FISHERIES ACT (CONT'D)	Fisheries and Oceans	**35. Harmful alteration, etc., of fish habitat.** (1) No person shall carry on any work or undertaking that results in the harmful alteration, disruption or destruction of fish habitat. (2) No person contravenes subsection (1) by causing the alteration, disruption or destruction of fish habitat by any means or under any conditions authorized by the Minister or under regulations made by the Governor in Council under this Act. **36. Throwing overboard of certain substances prohibited.** (1) No one shall (a) throw overboard ballast, coal ashes, stones or other prejudicial or deleterious substances in any river, harbour or roadstead, or in any water where fishing is carried on; (b) leave or deposit or cause to be thrown, left or deposited, on the shore, beach or bank of any water or on the beach between high and low water mark, remains or offal of fish or of marine mammals; or (c) leave decayed or decaying fish in any net or other fishing apparatus. (2) Remains or offal described in subsection (1) may be buried ashore, above high water mark. (3) Subject to subsection (4), no person shall deposit or permit the deposit of a deleterious substance of any type in water frequented by fish or in any place under any conditions where the deleterious substance or any other deleterious substance that results from the deposit of the deleterious substance may enter any such water. (4) No person contravenes subsection (3) by depositing or permitting the deposit in any water or place of (a) waste or pollution of a type, in a quantity and under conditions authorized by regulations applicable to that water or place made by the Governor in Council under any Act other than this Act; or (b) a deleterious substance of a class, in a quantity or concentration and under conditions authorized by or pursuant to regulations applicable to that water or place or to any work or undertaking or class thereof, made by the Governor in Council under subsection (5). (5) The Governor in Council may make regulations for the purpose of paragraph (4)(b) prescribing (a) the deleterious substances or classes thereof authorized to be deposited notwithstanding subsection (3);

ACT	DEPARTMENT	REPORTING PROVISION
FISHERIES ACT (CONT'D)	Fisheries and Oceans	(b) the waters or places or classes thereof where any deleterious substances or classes thereof referred to in paragraph (a) are authorized to be deposited; (c) the works or undertakings or classes thereof in the course or conduct of which any deleterious substances or classes thereof referred to in paragraph (a) are authorized to be deposited; (d) the quantities or concentrations of any deleterious substances or classes thereof referred to in paragraph (a) that are authorized to be deposited; (e) the conditions or circumstances under which and the requirements subject to which any deleterious substances or classes thereof referred to in paragraph (a) or any other quantities or concentrations of those deleterious substances or classes thereof are authorized to be deposited in any waters or places or classes thereof referred to in paragraph (b) or in the course or conduct of any works or undertakings or classes thereof referred to in paragraph (c); and (f) the persons who may authorize the deposit of any deleterious substances or classes thereof in the absence of any other authority, and the conditions or circumstances under which and requirements subject to which those persons may grant the authorization. 38. Duty to report. (4) Where, out of the normal course of events, there occurs a deposit of a deleterious substance in water frequented by fish or a serious and imminent danger thereof by reason of any condition, and where any damage or danger to fish habitat or fish or the use by man of fish results or may reasonably be expected to result therefrom, any person who at any material time (a) owns the deleterious substance or has the charge, management or control thereof, or (b) causes or contributes to the causation of the deposit or danger thereof, shall, in accordance with any regulations applicable thereto, report such occurrence to an inspector or such other person or authority as is prescribed by the regulations. (5) Every person referred to in paragraph (4)(a) or (b) shall, as soon as possible in the circumstances, take all reasonable measures consistent with safety and with the conservation of fish and fish habitat to prevent any occurrence referred to in subsection (4) or to counteract, mitigate or remedy any adverse effects that result or may reasonably be expected to result therefrom. (9) The Governor in Council may make regulations prescribing (a) the person or authority to whom or which a report is to be made under subsection (4), the manner in which the report is to be made, the information to be contained therein and the circumstances in which no report is required to be made;

OIL AND GAS PRODUCTION AND CONSERVATION ACT	Energy, Mines and Resources	**24. Oil and Gas Spills.** (1) In sections 25 to 28, "spill" means a discharge, emission or escape of oil or gas other than one that is authorized pursuant to subsection (4) or any other Act of Parliament. (2) In sections 26 and 28, "debris" means any installation or structure on the seabed of those submarine areas described in paragraph 3(b) that was put in place in the course of any work or activity authorized pursuant to paragraph 5(1)(b) and that has been abandoned without such authorization as may be required by or pursuant to this Act or any material that has broken away or has been jettisoned, or that has been displaced from the seabed, in the course of any such activity. (3) In section 26, "actual loss or damage" includes loss of income, including future income, and, with respect to any aboriginal peoples of Canada, includes loss of hunting, fishing and gathering opportunities. (4) The Governor in Council may make regulations authorizing the discharge, emission or escape of oil or gas of such types, in such quantities, at such locations, under such conditions and by such persons as are specified in the regulations, but Her Majesty in right of Canada has no liability whatever to any person arising out of that authorization. **25. Spills prohibited.** (1) No person shall cause or permit a spill on or from any area to which this Act applies. (2) Where a spill occurs in an area to which this Act applies, any person who at the time of the spill is carrying on any work or activity related to the exploration for or development or production of oil or gas in the area of the spill shall, in the manner prescribed by the regulations, report the spill to the Chief Conservation Officer. (3) Every person required to report a spill under subsection (2) shall, as soon as possible, take all reasonable measures consistent with safety and the prevention of pollution to prevent any further spill, to repair or remedy any condition resulting from the spill and to reduce or mitigate any danger to life, health, property or the environment that results or may reasonably be expected to result from the spill. (4) Where the Chief Conservation Officer, on reasonable grounds, is satisfied that (a) a spill has occurred in any area to which this Act applies and immediate action is necessary in order to effect any reasonable measures referred to in subsection (3), and (b) such action is not being taken or will not be taken under subsection (3), he may take such action or direct that it be taken by such persons as may be necessary.

Interpretation.** In this Act, "dangerous goods" means any product, substance or organism included by its nature or by the regulations in any of the classes listed in the Schedule; **17. Dangerous Occurrences.** (1) Where there occurs an event referred to in paragraph 15(1)(a)*, any person who at the time has the charge, management or control of the dangerous goods, shall, in the manner and circumstances set out in the regulations applicable thereto, report the discharge, emission or escape to an inspector or to such person as prescribed. (2) Every person required to make a report under subsection (1) shall, as soon as possible in the circumstances, take all reasonable emergency measures consistent with public safety to repair or remedy any dangerous condition or reduce or mitigate any danger to life, health, property or the environment that results or may reasonably be expected to result from the discharge, emission or escape. *An event as referred to in paragraph 15(1)(a) is a discharge, an emission or an escape of dangerous goods or an emission of ionizing radiation exceeding levels or quantities prescribed pursuant to the Atomic Energy Control Act from any container, packaging or means of transport by means of which the goods are being handled or transported. **21. The Governor in Council may make regulations generally for carrying out the purposes and provisions of this Act and, in particular, but without restricting the generality of the foregoing, may make regulations** **(o) prescribing any person to whom a report is to be made under subsection 17(1), the manner of reporting, the information to be included in the report and the circumstances in which a report need not be made;**
Transportation of Dangerous Goods Regulations	Part IX Safety Requirements for the Training of Persons and for Reporting	**9.1 Interpretation.** For the purposes of this Part, "dangerous occurrence" means (a) where dangerous goods are included in a class and a division, if any, set out in column I of an item of Table I to this Part, a discharge, emission or escape from any container, packaging or means of transport that contains the dangerous goods, which discharge, emission or escape i) is in a quantity or at a level set out in column II of that item, and ii) represents a danger to health, life, property or the environment,

ACT	DEPARTMENT	REPORTING PROVISION
TRANSPORTATION OF DANGEROUS GOODS ACT (CONT'D)	Transport Canada	
Transportation of Dangerous Goods Regulations (Cont'd)		(b) a transportation accident in which any means of bulk containment that contains dangerous goods is damaged, (c) a transportation accident involving dangerous goods included in Class 7, (d) an unintentional explosion or fire involving dangerous goods, or (e) where an aircraft, an aerodrome or an air cargo handling facility adjacent to an aerodrome is involved, the same as "Dangerous goods accident" or "Dangerous goods incident" as defined in Chapter 3 of Part 1 of the ICAO Technical Instructions; "employer" includes a person who (a) employs one or more individuals, or (b) provides the services of one or more individuals; 9.13 Dangerous Occurrence Immediate Reporting. (1) A person who has the charge, management or control of dangerous goods at the time he discovers or is advised of a dangerous occurrence in respect of those goods shall immediately notify or cause to be notified (a) the appropriate authority of the province in which the goods are located by calling the authority or telephone number specified for that province in column II of Table II to this part; (b) where a railway vehicle is involved, the Canadian Transport Commission; (c) where a ship is involved (i) the nearest Canadian Coast Guard Ship Safety Office, and (ii) the regulatory authority of the nearest port, harbour, wharf or place; (d) Where an aircraft is involved or the occurrence takes place at an aerodrome or at an air cargo handling facility adjacent to an aerodrome, the Regional Aviation Regulations Office of the Aviation Group of the Department of Transport and, if the aerodrome is an airport, the airport operator; (e) his employer; (f) where a road vehicle is involved, the owner, lessee or charterer of the road vehicle; and (g) the owner or the consignor of the consignment of dangerous goods.

ACT	DEPARTMENT	REPORTING PROVISION
TRANSPORTATION OF DANGEROUS GOODS ACT (CONT'D)	Transport Canada	
Transportation of Dangerous Goods Regulations (Cont'd)		9.14. Dangerous Occurrence 30 Days Reporting. (1) The employer of a person who has the charge, management or control of dangerous goods at the time of (a) the discovery of a dangerous occurrence relating to those goods, (b) an accident in which there is a release of the dangerous goods and a person is killed or is injured seriously enough to require hospitalization, (c) the discovery of damage to the integrity of any pressurized means of containment of the dangerous goods, (d) the suspicion that the container that contains the dangerous goods has suffered damage to its integrity resulting from impact, stress or fatigue, or (e) the discovery that all or part of a consignment of dangerous goods included in Class 1 or 7 has been misplaced, lost or stolen. shall within 30 days of that time, notify the Director General by providing the Director General with the information required in Form 2 set out in Schedule IX.

SCHEDULE II

Maximum Permissible Doses and Exposures (1, 2)

Table 1

Maximum Permissible Doses (3)

Column I	Column II		Column III
	Atomic Radiation Workers		
Organ or Tissue	Rems per quarter of a year	Rems per year	Any Other Person Rems per year
Whole body, gonads, bone marrow	3(4)	5(4)	0.5
Bone, skin, thyroid	15	30	3(5)
Any tissue of hands, forearms, feet and ankles	38	75	7.5
Lungs (6) and other single organs or tissues	8	15	1.5

Table 2

Maximum Permissible Exposure to Radon Daughters (6)

Column I		Column II
Atomic Radiation Workers		Any Other Person
WLM per quarter of a year	WLM per year	WLM per year (7)
2	4	0.4

Notes to Schedule II

(1) The maximum possible doses and exposures specified in this Table do not apply to ionizing radiation

(a) received by a patient in the course of medical diagnosis or treatment by a qualified medical practitioner; or

(b) received by a patient carrying out emergency procedures undertaken to avert danger to human life.

(2) The Board may, under extraordinary circumstances, permit single or accumulated doses or exposures up to twice the annual maximum permissible doses or exposures for atomic radiation workers. Such variance will not be granted

(a) if appropriate alternatives are available;

(b) for irradiation of the whole body or abdomen of women of reproductive capacity; or

(c) for irradiation of the whole body, gonads or bone marrow if the average dose received from age 18 years up to and including the current year exceeds 5 rems per year.

(3) In determining the dose, the contribution from sources of ionizing radiation both inside and outside the body shall be included.

(4) The dose to the abdomen of a pregnant atomic radiation worker after the licensee is informed of the pregnancy of that worker shall not exceed a total of 1 rem, accumulated at a rate of not more than 0.06 rem per two weeks.

(5) The dose to the thyroid of a person under the age of 16 years shall not exceed 1.5 rems per year.

(6) For exposure to radon daughters, the maximum permissible exposures (in working level months) apply instead of the maximum permissible doses for the lungs (in rems).

(7) The WLM unit is not appropriate for exposures in the home or in other non-occupational situations. In such situations, the maximum permissible average concentration of radon daughters attributable to the operation of a nuclear facility shall be 0.02 WL.

SCHEDULE I
(sections 13, 33 to 37)

LIST OF TOXIC SUBSTANCES

Item	Column I Name or Description of Substance	Column II Type of Regulation Applicable
1.	Chlorobiphenyls that have the molecular formula $C_{12}H_{10-n}Cl_n$ in which "n" is greater than 2	(a) Prohibited commercial, manufacturing or processing uses (b) Maximum concentrations in products (c) Maximum quantities and concentrations that may be released into the environment (d) Treatment and destruction of waste (e) Prohibition of the export of waste (f) Storage of waste*
2.	Dodecachloropentacyclo [5.3.0.$0^{2.6}$.$0^{3.9}$.$0^{4.8}$] decane	Prohibited commercial, manufacturing or processing uses
3.	Polybrominated Biphenyls that have the molecular formula $C_{12}H_{10-n}Br_n$ in which "n" is greater than 2	Prohibited commercial, manufacturing or processing uses
4.	Chlorofluorocarbon: totally halogenated chloro-fluorocarbons that have the molecular formula $C_nCl_xF_{(2n+2-x)}$	(a) Prohibited commercial, manufacturing or processing uses (b) Quantities that may be manufactured or imported
5.	Polychlorinated Terphenyls that have a molecular formula $C_{18}H_{14-n}Cl_n$ in which "n" is greater than 2	Prohibited commercial, manufacturing or processing uses
6.	Asbestos	Limited atmospheric releases from asbestos mines and mills
7.	Lead	Limited atmospheric releases from secondary lead smelters
8.	Mercury	Limited atmospheric releases from chlor-alkali mercury plants
9.	Vinyl Chloride	Limited atmospheric releases from vinyl chloride and polyvinyl chloride plants
10.	Bromochlorodifluoromethane that has the molecular formula CF_2BrCl	(a) Quantities that may be imported (b) Prohibited commercial, manufacturing or processing uses
11.	Bromotrifluoromethane that has the molecular formula CF_3Br	(a) Quantities that may be imported (b) Prohibited commercial, manufacturing or processing uses
12.	Dibromotetrafluoroethane that has the molecular formula $C_2F_4Br_2$	(a) Quantities that may be imported (b) Prohibited commercial, manufacturing or processing uses

* Currently being made into regulations.

SCHEDULE I

(Section 6)

MALFUNCTION OR BREAKDOWN REPORT

Name of Owner or Operator _____

Address of Plant _____

Telephone Number _____

Unit or Process _____

Release Source _____

Production Rate* _____

Date _____

Time _____

Nature of Malfunction or Breakdown _____

_____

Duration (minutes) _____

Release of Vinyl Chloride during Malfunction or Breakdown (Quantity and concentration) _____

as determined by (measurement method) _____

Cause _____

* Not required in case of a release from a process vent.

SCHEDULE
(Sections 2, 21 and 24)

Class 1-- Explosives, including explosives within the meaning of the Explosives Act

Class 2-- Gases: compressed, deeply refrigerated, liquified or dissolved under pressure

Class 3-- Flammable and combustible liquids

Class 4-- Flammable solids: substances liable to spontaneous combustion; substances that on contact with water emit flammable gases

Class 5-- Oxidizing substances; organic peroxides

Class 6-- Poisonous (toxic) and infectious substances

Class 7-- Radioactive materials and prescribed substances within the meaning of the Atomic Energy Control Act

Class 8-- Corrosives

Class 9-- Miscellaneous products, substances or organisms considered by the Governor in Council to be dangerous to life, health, property or the environment when handled, offered for transport or transported and prescribed to be included in this class

ANNEXE
(articles 2, 21 et 24)

Classe 1 : Explosifs, y compris les autres matières assimilées à ceux-ci par la Loi sur les explosifs.

Classe 2 : Gaz comprimés, liquéfiés, dissous sous pression ou liquéfiés à très basse température.

Classe 3 : Liquides inflammables et combustibles.

Classe 4 : Solides inflammables; matières sujettes à l'inflammation spontanée; matières qui, au contact de l'eau, dégagent des gaz inflammables.

Classe 5 : Matières comburates; peroxydes organiques.

Classe 6 : Matières toxiques et matières infectieuses.

Classe 7 : Matières radioactives et substances réglementées, au sens de la Loi sur le contrôle de l'énergie atomique.

Classe 8 : Matières corrosives.

Classe 9 : Produits, matières ou organismes dont la manutention ou le transport présentent, selon le gouverneur en conseil, des risques de dommages corporels ou matériels ou de dommages à l'environnement et qui sont inclus par règlement dans la présente classe.

TABLE I

Quantities or Levels for Immediate Reporting

Item	Column I Class and Division	Column II Quantities or Levels
1.	1	All
2.	2.1	At least 100 L*
3.	2.2	At least 100 L*
4.	2.3	All
5.	2.4	All
6.	3	At least 200 L
7.	4	At least 25 kg
8.	5.1	At least 50 kg or 50 L
9.	5.2	At least 1 kg or 1 L
10.	6.1	At least 5 kg or 5 L
11.	6.2	All
12.	7	Any discharge or a radiation level exceeding 10 mSv/h at the surface and 200 µSv/h at 1 m from the package surface.
13.	8	At least 5 kg or 5 L
14.	9.1	At least 50 kg
15.	9.2	At least 1 kg
16.	9.3	At least 5 kg or 5 L

* container capacity

TABLE II

Notification to Provinces

Item	Column I Province	Column II Emergency Authority or Telephone Number
1.	Alberta	Local police
2.	British Columbia	Local police or (604) 387-5956
3.	Manitoba	Local police or fire brigade, as appropriate, or (204) 944-4888
4.	New Brunswick	Local police or Zenith 49000*
5.	Newfoundland	Local police or (709) 772-2083
6.	Northwest Territories	(403) 873-7554
7.	Nova Scotia	Local police or Zenith 49000* or (902) 426-6030
8.	Ontario	Local police
9.	Prince Edward Island	Local police or Zenith 49000*
10.	Quebec	Local police
11.	Saskatchewan	Local police or 1-800-667-7525**
12.	Yukon Territory	(403) 667-7244

* This telephone number is not accessible from outside the provinces of New Brunswick, Nova Scotia or Prince Edward Island.

** This telephone number is not accessible from outside Saskatchewan.

SCHEDULE IX

(s. 9.14)

FORM 2

DANGEROUS OCCURRENCE REPORT

(complete all applicable sections)

1. Type of dangerous occurrence (check all applicable boxes)

☐ Spill ☐ Leak ☐ Contamination

☐ Explosion ☐ Fire

☐ Property ☐ Human ☐ Environment

Other (please specify) _____

2. Date of dangerous occurrence _____
Y M D

3. Time of dangerous occurrence _____ (24 hr. system)

4. Location of dangerous occurrence: _____
City/Town/Municipality/Province

5. ☐ Residential Area ☐ Urban Core area ☐ Commercial and Residential area ☐ Industrial Area ☐ Rural Area

6. Dangerous occurrence happened:

☐ During transport ☐ During handling (specify) _____ ☐ During temporary storage

Other _____

7 Complete A or B

A. Dangerous occurrence during transport

I. Mode of transport:

☐ Road ☐ Air

☐ Rail ☐ Marine

II. Type of vehicle: _____

III. Carrier (name and address)

_____

_____

_____

Or B. Dangerous occurrence during handling or temporary storage

I. Facility:

Terminal: ☐ Air ☐ Rail ☐ Road

Port: ☐ On shore ☐ On ship

Warehouse: ☐ Bulk storage plant ☐ Other

Other _____

II. Name and address of the facility

_____

_____

_____

8. Consignor (Name) _____

(Address) _____

9 Origin of consignment: _____

10. Destination of consignment: _____

11. Dangerous goods involved in the occurrence were: ☐ In bulk ☐ Packaged ☐ In containers

P.I.N.	Classification	Shipping Name	Type of Package	Total Mass or Volume of Shipment	Mass or Volume of Estimated Loss

12. Describe the events leading to, during and resulting from the dangerous occurrence:

13. Number of Deaths: _____

14. Number of injured persons requiring hospitalization: _____

15. Evacuation of surrounding area: ☐ Yes ☐ No

16. Emergency response personnel at site of dangerous occurrence:

☐ Police ☐ Fire Department ☐ Other _____

17. Comments and additional information:

18. Information on the person completing this report

Name: _____

Title: _____

Address: _____

Telephone Number: _____
area code/number

I certify that this information is accurate to the best of my knowledge.

PROVINCIAL

PROVINCE	DEPARTMENT/ACT	REPORTING PROVISION
NORTHWEST TERRITORIES	Department of Renewable Resources Environmental Protection Act	2. In this Act (b) "contaminant" means any noise or substance that, if discharged into the environment, (i) endangers the health, safety or welfare of persons, (ii) interferes or is likely to interfere with normal enjoyment of life or property, (iii) endangers the health of animal life, or (iv) causes or is likely to cause damage to plant life or to property; (g) "substance" means any solid, liquid, gas, odour or organism or combination of any of them. 6.1. Where a discharge of a contaminant into the environment in contravention of this Act or the regulations occurs or a reasonable likelihood of such a discharge exists, every person causing or contributing to the discharge or increasing the likelihood of a discharge, and the owner or the person in control of the contaminant immediately before its discharge or likely discharge, shall immediately (a) subject to any regulations, report the discharge to the person or office designated by the regulations; (b) take all reasonable emergency measures consistent with public safety to prevent or eliminate any danger to life, health, property or the environment that results or may reasonably be expected to result from the discharge or likely discharge; and (c) make a reasonable effort to notify every member of the public who may be adversely affected by the discharge or likely discharge.

	Pesticide Act	2. Interpretation. In this Act (d) "pesticide" means any toxic or noxious substance or mixture of substances intended, sold or represented for use in preventing, destroying, repelling or mitigating any insect, nematode, rodent, predatory animal, bacteria, fungus, weed or other form of plant or animal life or virus, except a virus, bacteria or fungus in living man or animals; 10. Regulations. The Commissioner may make regulations (a) prescribing the qualifications and conditions that must be met before a person may be issued a permit to apply a pesticide in any of the Territories; (b) prohibiting the application of pesticides in any area of the Territories; (c) requiring persons holding permits to keep records and to make returns in such manner as the regulations may prescribe;
	Pesticide Regulations	13. Reporting. (1) The holder of a permit shall, as soon as is reasonably practicable, notify an inspector when a pesticide is (a) lost through fire or theft; or (b) discharged into the environment by a spill or any other occurrence except an application or disposal pursuant to a permit. (2) For the purposes of notifying an inspector under subsection (1), a person may telephone (a) where a spill has occurred, the Northwest Territories Twenty-four Hour Spill Report Line at (403) 920-8130; or (b) in any other case, the Pollution Control Division of the Department of Renewable Resources at (403) 873-7654.

	Transportation of Dangerous Goods Act	**2. Definitions.** In this Act (n) "Transportation of Dangerous Goods Act (Canada)" means the Transportation of Dangerous Goods Act (Canada), as amended from time to time and includes the regulations made under that Act from time to time unless the context indicates otherwise; **14. Regulations.** (1) The Commissioner upon the recommendation of the Minister, may make regulations (i) prescribing shipping documents and other documents to be used in respect of the transportation of dangerous goods in a vehicle on a highway, the information to be included in such documents and the persons by whom and manner in which such documents are to be used and retained; (j) prescribing forms for the purposes of this Act and the regulations; (2) Any regulation made under subsection (1) may adopt by reference in whole or in part with such changes as the Commissioner, upon the recommendation of the Minister, considers necessary any code or standard, or any regulation made by the Government of Canada, and may require compliance with any code, standard or regulation that is so adopted. **15. Agreements respecting enforcement.** (1) The Minister may enter into an agreement with the Government of Canada with respect to the administration and enforcement of this Act and the regulations or any provision thereof. (2) An agreement entered into under subsection (1) may provide for any matters necessary for or incidental to the implementation, administration or enforcement agreed on and for the apportionment of any costs, expenses or revenues arising therefrom.
	Transportation of Dangerous Goods Regulations	2. In these regulations: "Federal Regulations" means the English version of the Transportation of Dangerous Goods Regulations made under the Transportation of Dangerous Goods Act (Canada). **3. Federal Regulations.** (1) Subject to this section, the Federal Regulations are adopted with such modification as the circumstances require. (2) Any reference in the Federal Regulations to a means of transport, other than a vehicle or a combination of vehicles on a highway, and to handling and offering for transport of dangerous goods is not adopted for the purposes of these regulations.

	PART 9 Release of Contaminants	113. Report of release. Every person who releases a contaminant in an amount, concentration or level in excess of that prescribed by regulation or allowed under a permit shall, as soon as possible under the circumstances, report the release to an environmental protection officer or to a person designated by regulation.
	PART 11 Spills	132. Definition. In this Part, "spill" means a release of a substance (a) into the natural environment; (b) from or out of a structure, vehicle or other container; and (c) that is abnormal in quantity or quality in light of all circumstances of the release; or (d) in excess of the amount specified in the regulations. " substance" means a hazardous substance, pesticide, contaminant or special waste. 133. Report of spill. A person in control of a substance at the time of a spill or who causes a spill shall report the spill, as soon as possible under the circumstances, to an environmental protection officer and shall make a reasonable effort to notify the owner or person in charge of the spilled substance and any members of the public who may be adversely affected by the spill. 134. Contents of report. The person who is required to report pursuant to section 133 shall report in person or by telephone, and shall, where he or she has knowledge of the information or can readily obtain it, provide the following information (a) the location and time of the spill; (b) a description of the circumstances leading up to the spill; (c) the type and quantity of the material or substance which has spilled; (d) the details of any action taken at the site of the spill; (e) a description of the location of the spill and the immediately surrounding area; and (f) any additional information in respect of the spill that the Minister, environmental protection officer or person designated by the regulations requires.

Regulations.** (1) The Lieutenant Governor in Council may make regulations: (v) governing the duties of any person and the procedures to be followed in the reporting, controlling, handling, transporting, disposing of and remedying adverse effects of pollutants;
	Environmental Spill Control Regulations	**2. Interpretation.** In these regulations: (c) "spill" means a discharge, other than a discharge that is expressly authorized under the Act or any other Act, of a pollutant that is listed in Column I of the Appendix and that is: (i) in the form, character or concentration specified for that pollutant in the corresponding row of Column II of the Appendix or, if no form, character or concentration is specified in Column II, in any form, character or concentration; (ii) discharged in an amount equal to or exceeding the amount specified for that pollutant in the corresponding row of: (A) in the case of a discharge occurring onsite, Column III of the Appendix, or (B) in the case of a discharge not occurring onsite, Column IV of the Appendix; (iii) discharged within the time period specified for that pollutant in the corresponding row of Column V of the Appendix; but does not include the intentional, lawful and prudent use of a pollutant for a purpose and in a manner that is generally recognized and accepted as ordinary and normal.

PROVINCE	DEPARTMENT/ACT	REPORTING PROVISION
SASKATCHEWAN	Department of the Environment and Public Safety Environmental Management and Protection Act (Cont'd) Environmental Spill Control Regulations (Cont'd)	4. Report of spill. Where a spill occurs, the person having control of a pollutant which is spilled shall report the spill as soon as possible to: (a) the department; (b) each owner of property on which the pollutant is spilled; and (c) the owner of the pollutant. 5. Report by police officer, municipal employee. Every member of a police force, and every employee of an urban municipality or a rural municipality, who has knowledge of a spill shall report the spill as soon as possible to the department, unless he has reasonable grounds to believe that it has been reported to the department by another person. 6. Manner of reporting and contents of report. A person who is required to make report pursuant to clause 4(a) or section 5 shall telephone the department at telephone number (800) 667-3503 and shall include in the report, where the information is known or can be readily obtained by him: (a) the location and time of the spill; (b) the type and quantity of the pollutant spilled; (c) the details of any action taken and proposed to be taken at the spill-site to meet the requirements of section 8; and (d) a description of the location of the spill and the immediately surrounding area. 7. Written report. (1) Subject to subsection (2) and within seven days of the making of a report pursuant to clause 4(a), the person having control of a pollutant which is spilled and the owner of a pollutant which is spilled each shall submit to the department a written report stating: (a) the location and time of the spill;

PROVINCE	DEPARTMENT/ACT	REPORTING PROVISION
SASKATCHEWAN	Department of the Environment and Public Safety Environmental Management and Protection Act (Cont'd) Environmental Spill Control Regulations (Cont'd)	(b) the type and quantity of the pollutant spilled; (c) a description of the spill-site area; (d) the names of all persons notified of the spill; (e) the known causes and effects of the spill; (f) any remedial action that was taken with respect to the spill; and (g) any further action or work that is contemplated or required. (2) The person having control of a pollutant which is spilled and the owner of a pollutant which is spilled may submit a joint report.
	Hazardous Substances Regulations	13. Duties of operator, owner. The operator or owner of a storage facility shall: (a) maintain all documents, including a Material Safety Data Sheet as defined in the regulations made pursuant to the Hazardous Products Act (Canada), containing all hazard information concerning all hazardous substances stored at the facility and subject to trade secret provisions under the Hazardous Products Act (Canada) and other applicable legislation, the chemical ingredients of all hazardous substances stored at the storage facility; (b) maintain a copy of the list of all hazardous substances stored at the storage facility and their inventory records; (c) report any unaccountable discrepancy in inventory or leakage of a hazardous substance to the department in accordance with the Environmental Spill Control Regulations, where applicable; (d) maintain inspection and maintenance records for the leak detection and containment systems at the facility; (e) maintain a copy of the facility emergency response contingency plans, including proposed actions in response to potential accidents related to the operation of the storage facility; and (f) retain the records described in clauses (b) and (d) for at least two years from the date of their creation and, on request, make those records available to the minister or any person designated by the minister.

	Environment Quality Act	1. Interpretation. In this Act, unless the context indicates a different meaning, the following words and expressions mean or designate: (5) "contaminant": a solid, liquid or gaseous matter, a microorganism, a sound, a vibration, rays, heat, an odour, a radiation or a combination of any of them likely to alter the quality of the environment in any way; 20. Emission, etc. No one may emit, deposit, issue or discharge or allow the emission, deposit, issuance or discharge into the environment of a contaminant in greater quantity or concentration than that provided for regulation of the Lieutenant-Governor in Council. Idem. The same prohibition applies to the emission, deposit, issuance or discharge of any contaminant the presence of which in the environment is prohibited by regulation of the Lieutenant-Governor in Council or is likely to affect the life, health, safety, welfare or comfort of human beings, or to cause damage to or otherwise impair the quality of the soil, vegetation, wildlife or property. 21. Accident. Whoever is responsible for the accidental presence in the environment of a contaminant contemplated in section 20 must advise the Director without delay.
	Hazardous Waste Regulation	1. Definitions. In this Regulation, unless the context indicates otherwise: "hazardous waste" means: (1) the classes of waste listed in Schedule I; (2) any solid waste, semiliquid waste at 20 C, liquid waste or gaseous waste confined in a transportable container that, as shown in the Decision Flow Chart in Schedule II, is ignitable, corrosive, leachable, radioactive, reactive or toxic; 81. Accidental spill. If an accident occurs during transport and hazardous waste is spilled, a carrier shall: (1) stop the spill; (2) contain the hazardous waste;

NEW BRUNSWICK	Department of Transportation	
	Transportation of Dangerous Goods Act	1. In this Act "dangerous goods" means a product, substance or organism included by its nature or by the regulations in any of the classes listed in Schedule A; 16. The Lieutenant-Governor in Council may make regulations (o) requiring that where there occurs a discharge, emission or escape of dangerous goods from any container, packaging or vehicle on a highway, the persons having charge, management or control of the dangerous goods, shall report the discharge, emission or escape to a designated person, and designating the person to whom the report is to be made and prescribing the information in the report and the manner of reporting;
	General Regulation	2. In this regulation "federal regulation" means the Transportation of Dangerous Goods Regulations, excluding Parts X, XI, and XII and the provisions dealing with radioactive materials, made under the Transportation of Dangerous Goods Act, chapter T-19 of the Revised Statutes of Canada, 1985. 4. Subject to the Act and this Regulation, the provisions of the federal regulation regarding (a) the safety requirements to be complied with, and (b) the safety standards required for vehicles, containers and packaging and the safety marks to be displayed on such vehicles, containers and packaging are adopted and compliance with the provisions as adopted are required.

NOVA SCOTIA	Canada-Nova Scotia Offshore Petroleum Board	
	Canada-Nova Scotia Offshore Petroleum Resources Accord (NS) Implementation Act	2. Interpretation. In this Act, (m) "gas" means natural gas and includes all substances, other than oil, that are produced in association with natural gas; (s) "oil" means (i) crude oil regardless of gravity produced at a well head in liquid form, and (ii) any other hydrocarbons, except coal, and, without limiting the generality of the foregoing, hydrocarbons that may be extracted or recovered from deposits of oil sand, bitumen, bituminous sand, oil shale or from any other types of deposits on the surface or subsurface or the seabed or subsoil thereof of the offshore area; (t) "petroleum" means oil or gas; 6. Approval by Federal Minister. Before a Regulation is made pursuant to subsection (1) of Section 5, subsection (4) of Section 17, subsection (8) of Section 35, subsection (7) of Section 39, subsection (7) of Section 45, Section 51, Section 70, subsection (2) of Section 73, Section 99, Section 120, subsection (1) of Section 124, Section 127, subsection (1) of Section 146, subsection (5) of Section 149, subsection (4) of Section 157 or Section 200, the Minister shall consult the federal Minister with respect to the proposed regulation and no regulation shall be made without the approval of the federal Minister. 157. "spill" defined (1) In Sections 158 to 162, "spill" means a discharge, emission or escape of petroleum other than one that is authorized pursuant to subsection (4) or any Act of the Legislature or that constitutes a discharge of a pollutant caused by or otherwise attributable to a ship within the meaning of the Canada Shipping Act. (2) In Sections 159 and 162 "debris" means any installation or structure on the seabed of the offshore area that was put in place in the course of any work or activity authorized pursuant to clause (b) of subsection (1) of Section 135 and that has been abandoned without such authorization as may be required by or pursuant to this Part or any material that has broken away or has been jettisoned, or that has been displaced from the seabed, in the course of any such work or activity. (3) In Section 159, "actual loss or damage" includes loss of income, including future income.

PRINCE EDWARD ISLAND	Department of Environment	
	Environmental Protection Act	1. In this Act (b) "contaminant" includes any solid, liquid, gas, waste, odour, sound or a combination of any of them that is foreign to or in excess of the natural constituents of the environment into which it is being introduced and (i) adversely affects the aesthetic, natural, physical, chemical or biological quality of the environment; (ii) is or may be injurious to the health or safety of persons, or injurious or damaging to property or to plant or animal life, or (iii) interferes with or is likely to interfere with the comfort, well-being, livelihood or enjoyment of life by a person; (d) "discharge" includes any drainage, deposit, release, spill, leak or emission; 20. Spills. Except as permitted by the regulations or by the Minister in writing, no person shall discharge, or cause or permit to be discharged, any contaminant into the environment. 21. Notice and remedial measures. Every person who, without permission under section 20, discharges, or causes or permits to be discharged, a contaminant into the environment, or, who owns or has control of a contaminant which is discharged into the environment, shall forthwith notify the Department and take such remedial measures as the Minister may direct. 25. Regulations. (1) The Lieutenant Governor in Council may make regulations for the enhancement and protection of the environment, and in particular, (r) prescribing forms;
	Petroleum Storage Tanks Regulations	1. Interpretation. In these regulations (1) "petroleum" means a mixture of hydrocarbons, with or without additives, that is used or could be used as a combustible fuel for internal combustion engines, (including gasoline, diesel fuel and airplane fuel), heating fuel, or lubricant (including used engine oil);

PROVINCE	DEPARTMENT/ACT	REPORTING PROVISION
PRINCE EDWARD ISLAND	Department of Environment Environmental Protection Act (Cont'd) Petroleum Storage Tanks Regulations (Cont'd)	13. Reporting leakage. (1) The operator of an underground storage tank system who is required to keep records pursuant to sections 11 or 12 shall immediately inform Transport Canada Canadian Coast Guard at telephone number 1-800-565-1633 or such other number as may be listed, when inventory records or reconciliation summary sheets show unaccounted for product loss or water gain. (2) Any person who has reason to believe that petroleum is leaking or has leaked from a storage tank system, or that water or other liquid is intruding or has intruded into a storage tank system shall immediately inform Transport Canada Canadian Coast Guard at telephone number 1-800-565-1633 or such other number as may be listed. (3) Where the Minister has reasonable and probable grounds to believe and does not believe that leakage is occurring in a storage tank system, he may order the owner to conduct a leak detection test. (4) An owner who receives an order pursuant to subsection (3) (a) shall have the test conducted, at his own expense, by a testing agent registered with the Minister; (b) shall, in the case of an underground storage system, have the test conducted using a liquid medium leak detection system capable of finding 190 millilitres product loss per hour; and (c) shall, within three days of the test, forward to the Minister the written results of the test, certified by the testing agent.

CANADIAN SPILL REPORTING PROVISIONS

PROVINCIAL

PROVINCE	DEPARTMENT/ACT	REPORTING PROVISION
PRINCE EDWARD ISLAND	Occupational Health and Safety Council	
	Occupational Health and Safety Act	17. Report of injury. (1) Where an accident occurs in the workplace in which an employee is injured in a manner that causes or may cause, a fatality or loss of limb, or that requires or may require admission to hospital, the employer shall ensure that a copy of the prescribed report form is forwarded to the Director immediately. (2) Where an accident is reported under subsection (1), notification shall forthwith be given to the joint health and safety committee where such exists or to the health and safety representative. 34. Regulations. The Lieutenant Governor in Council may make regulations (n) prescribing forms for use under this Act; (o) prescribing records to be kept by employers and submitted to the Division;

CANADIAN SPILL REPORTING PROVISIONS

PROVINCIAL

PROVINCE	DEPARTMENT/ACT	REPORTING PROVISION
PRINCE EDWARD ISLAND	Department of Agriculture	
	Pesticides Control Act	1. Definitions. In this Act (i) "pesticide" (i) means any product, device, organism, substance or thing intended, sold or represented for use in destroying or repelling any insect, nematode, rodent, predatory animal, bacterium, fungus, weed or other form of plant or animal life or virus, except bacteria or fungi living in man or animals, and (ii) includes any product, device, organism, substance or thing required to be registered under the Pest Control Products Act; 22. Regulations. The Lieutenant Governor in Council may make regulations (b) requiring persons licensed or holding a permit to keep such records and to make such returns and in such manner as the regulations may prescribe;
	Pesticides Control Act Regulations	2. Federal standards applied. The standards and requirements for registration, packaging and labeling, efficacy and safety, in respect to the sale, handling and use of any pesticide shall be those established by the Pest Control Products Act (Canada) and the regulations thereunder together with such additional requirements as are imposed by these regulations.

Schedule 1 – Hazardous Waste Categories (s. 1)

Surface Treatment and Plating

1. Sludges from galvanizing, electroplating, anodizing, phosphatizing and chromium plating operations;
2. wastewater treatment sludges from galvanizing, electroplating, anodizing, phosphatizing and chromium plating operations;
3. spent solutions resulting from galvanizing, anodizing, phosphatizing and chromium plating;
4. spent electroplating bath solutions from electroplating operations where cyanides, chromates, or acidic or basic metal solutions are used in the process;
5. electroplating bath sludges from electroplating operations where cyanides, chromates, or acidic or basic metal solutions are used in the process;
6. spent captive stripping or cleaning solutions from surface plating operations;
7. paint sludges and filters resulting from a water processing or air scrubbing system;
8. quenching bath sludges from oil or water baths from metal heat treating operations where cyanides are used in the process;
9. spent cyanide solutions from salt bath pot cleaning from metal heat treating operations;
10. quenching wastewater treatment sludges from metal heat treating operations where cyanides are used in the process;

Organic Chemistry

11. distillation bottoms from the production of acetaldehyde from ethylene;
12. distillation side cuts from the production of acetaldehyde from ethylene;
13. bottom stream from the wastewater stripper in the production of acrylonitrile;
14. bottom steam from the acetonitrile column in the production of acrylonitrile;
15. bottoms from the acetonitrile purification column in the production of acrylonitrile;
16. still bottoms from the distillation of benzyl chloride;
17. heavy ends or distillation residues from the production of carbon tetrachloride;
18. heavy ends or still bottoms from the purification column in the production of epichlorohydrin;
19. heavy ends from the fractionation column in ethyl chloride production;
20. heavy ends from the distillation of ethylene dichloride in ethylene dichloride production;
21. heavy ends from the distillation of vinyl chloride in vinyl chloride monomer production;
22. aqueous spent antimony catalyst waste from fluoromethanes production;
23. distillation bottom tars from the production of phenol/acetone from cumene;
24. distillation light ends from the production of phthalic anhydride from naphthalene;
25. distillation bottoms from the production of phthalic anhydride from naphthalene;
26. distillation bottoms from the production of maleic anhydride from benzene;
27. distillation light ends from the production of phthalic anhydride from ortho-xylene;
28. distillation bottoms from the production of phthalic anhydride from ortho-xylene;
29. distillation bottoms from the production of nitrobenzene by the nitration of benzene;
30. stripping still tails from the production of methy ethyl pyridines;
31. centrifuge and distillation residues from toluene diisocyanate production;
32. spent catalyst from the hydrochlorinator reactor in the production of 1,1,1-trichloroethane;
33. waste from the product steam stripper in the production of 1,1,1-trichloroethane;
34. distillation bottoms from the production of 1,1,1-trichloroethane;
35. heavy ends from the heavy ends column from the production of 1,1,1-trichloroethane;

36. column bottoms or heavy ends from the combined production of trichloroethylene and perchloroethylene;
37. distillation bottoms from aniline production;
38. process residues from aniline extraction from the production of aniline;
39. combined wastewater streams generated from nitrobenzene/aniline production;
40. distillation or fractionation column bottoms from the production of chlorobenzenes;
41. separated aqueous stream from the reactor product washing step in the production of chlorobenzenes;

Pesticides

42. by-product salts generated in the production of MSMA and cacodylic acid;
43. wastewater treatment sludge from the production of chlordane;
44. wastewater and scrub water from the chlorination of cyclopentadiene in the production of chlordane;
45. filter solids from the filtration of hexachlorocyclopentadiene in the production of chlordane;
46. vacuum stripper discharge from the chlordane chlorinator in the production of chlordane;
47. wastewater treatment sludges generated in the production of creosote;
48. still bottoms from toluene reclamation distillation in the production of disulfoton;
49. wastewater treatment sludges from the production of disulfoton;
50. wastewater from the washing and stripping of phorate production;
51. filter cake from the filtration of diethylphosphorodithioic acid in the production of phorate;
52. wastewater treatment sludge from the production of phorate;
53. wastewater treatment sludge from the production of toxaphene;
54. untreated process wastewater from the production of toxaphene;
55. heavy ends or distillation residues from the distillation of tetrachlorobenzene in the production of 2,4,5-T;

Wood Preservative

56. bottom sediment sludge from the treatment of wastewaters from wood preserving processes that use creosote, pentachlorophenol or inorganic components containing arsenic;

Ink Formulation

57. solvent washes and sludges, caustic washes and sludges, or water washes and sludges from cleaning tubs and equipment used in the formulation of ink from pigments, driers, soaps, and stabilizers containing chromium or lead;

Veterinary Pharmaceuticals

58. wastewater treatment sludges generated during the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds;
59. distillation tar residues from the distillation of aniline-based compounds in the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds;
60. residue from the use of activated carbon for decolorization in the production of veterinary pharmaceuticals from arsenic or organo-arsenic compounds;

Coal Derivatives and By-Products

61. decanter tank tar sludge from coking operations;
62. ammonia still lime sludge from coking operations;

Paint Formulation

63. settling tank sludge from paint formulation operations;
64. washer solutions from preparation or finishing tanks;

Petroleum Refining

65. dissolved air flotation (DAF) float from the petroleum refining industry;
66. API separator sludge from the petroleum refining industry;
67. bottom sludges from hydrocarbon tanks;
68. spent caustic soda solution resulting from petroleum refining processes;

Metallurgy

Iron and Steel

69. emission control sludge from iron and steel smelting furnaces;
70. sludge from cleaning operations associated with iron and steel rolling and finishing operations;
71. lime processing sludge from spent solutions from iron and steel finishing operations;
72. gas scrubbing sludge from iron and steel processing operations;

Aluminum

73. spent electrolytic potliners from primary aluminum production;
74. scrubbing system sludge from primary aluminum production operations;
75. air scrubbing system sludge from anodic and cathodic paste preparation for electrode production operations;

Ferroalloy

76. dust and sludge from waste gas purifiers from ferrochromium production;
77. dust and sludge from waste gas purifiers from ferrochromium silicon production;

Zinc, Copper

78. air scrubbing system sludge from acid production from primary copper or zinc production;
79. wastewater treatment sludge from primary zinc production operations;
80. residue mud and sludge from electrolytic zinc production operations;
81. leaching residue from cadmium by-products from primary zinc production;

Lead

82. emission control dust and sludge from secondary lead

smelting;
83. wastewater treatment sludge from secondary lead smelting;

Inorganic Chemistry

Inorganic Pigments

84. wastewater treatment sludge from the production of chrome yellow and orange pigments;
85. wastewater treatment sludge from the production of molybdate orange pigments;
86. wastewater treatment sludge from the production of zinc yellow pigments;
87. wastewater treatment sludge from the production of chrome green pigments;
88. wastewater treatment sludge from the production of iron blue pigments;
89. oven residue from the production of chrome oxide green pigments;
90. sludge from the production of cadmium pigments;
91. sludge from the production of white titanium oxide pigments;
92. sludge from the production of lead pigments;

Explosives

93. wastewater treatment sludges from the manufacturing and processing of explosives;
94. spent carbon from the treatment of wastewater containing explosives;
95. wastewater treatment sludges from the manufacturing, formulation and loading of lead-based initiating compounds;
96. pink/red water from TNT operations;

Miscellaneous Inorganic Residue

97. mud and sludge from elementary phosphorus production;
98. sludge from sodium chlorate production;
99. wastewater treatment sludge from sodium chlorate production;
100. brine purification muds from the mercury cell process in chlorine production;
101. chlorinated hydrocarbon waste from the purification step of the diaphragm cell process using graphite anodes in chlorine production;
102. wastewater treatment sludge from the mercury cell process for alkali chlorine production;
103. sludge from aluminum fluoride production;
104. sludge from cryolite recovery operations;

APPENDIX I

Waste Treatment Centre

105. residues from purification systems related to hazardous waste incineration systems;
106. solids or sludge from the alteration or chemical fixation of hazardous waste;
107. residues from any hazardous waste incineration system;

Tanning

108. chrome (blue) shavings generated during leather tanning and finishing processes;
109. sulphur-impregnated flesh or hair stripping sludge from operations in the leather tanning industry;
110. sludge from the wastewater treatment system of a tannery;

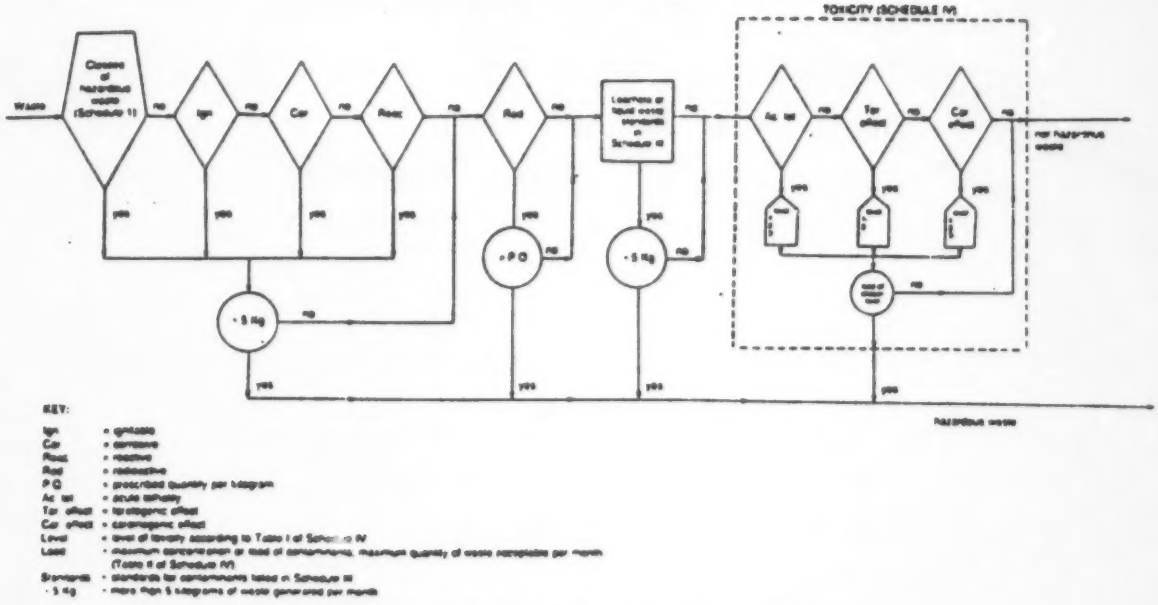
Miscellaneous

111. the following spent halogenated solvents: tetrachloroethylene, trichloroethylene methylene chloride, 1,1,1-trichloroethane, carbon tetrachloride, and chlorinated fluorocarbons, from degreasing operations; and sludges from the recovery of these solvents;
112. the following spent halogenated solvents: tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, chlorobenzene, 1,1,2-trichloro-1,2,2-trifluoroethane, ortho-dichlorobenzene, and trichlorofluoromethane; and the still bottoms from the recovery of these solvent;
113. the following spent non-halogenated solvents: xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, and methanol; and the still bottoms from the recovery of these solvents;
114. the following spent non-halogenated solvents: cresols and cresylic acid, and nitrobenzene; and the still bottoms from the recovery of these solvents;
115. the following spent non-halogenated solvents: toluene, methyl ethyl ketone, carbon disulphide, isobutanol, and pyridine; and the still bottoms from the recovery of these solvents;
116. spent lubricating or cutting oil and spent hydraulic oil;
117. spent penetrating oil used in ultraviolet testing;
118. spent acid solutions from lead accumulator breaking operations;
119. residues from the wastewater treatment system for plastic or metal container decontamination in cleansing plants;
120. ashes from any incineration system of sludge from water supply plants or from waste water treatment plants, whether domestic or municipal.

Environment Quality Act (Cont'd)

APPENDIX I

Schedule II – Decision Flow Chart (s. 1)



Schedule III – Table of Maximum Concentrations – Liquid Waste or Solid Waste Leachate* (s. 1)

Contaminants	Standards	
	*liquid waste mg/l***	*solid waste leachate mg/l***
Class 1		
Total Arsenic	1.0	5.0
Total Cadmium	2.0	2.0
Total Chromium	5.0	5.0
Total Copper	5.0	10
Total Mercury	0.05	0.2
Total Nickel	5.0	10
Total Lead	2.0	5.0
Total Selenium	1.0	1.0
Total Zinc	10	10
Total Sulphides	5.0	–
Total Fluorides	8.0	150
Cyanides Oxidizable By Chlorination	2.0	–
Phenolic Compounds	1.0	2.0
Total Mineral Oil and Grease	30	30
Total Polychlorinated Biphenyls***	0.3	0.01
Total Halogenated Hydrocarbons***	1.0	1.0
Total Monocyclic Aromatic Hydrocarbons***	1.0	1.0
Class 2		
Total Polycyclic Aromatic Hydrocarbons***	1.0	0.01
Total Chlorodibenzo-p-dioxine****	2.5×10^{-5}	2.5×10^{-5}
Total Chlorodibenzo Furan****	2.5×10^{-5}	2.5×10^{-5}
Other Inorganic Contaminants	10	10
Other Organic Contaminants***	1.0	1.0
Total Metals (including only As, Cd, Cr, Cu, Hg, Ni, Pb, Zn)	10	10

* The contaminants listed above are sampled and analyzed according to the procedure prescribed in "*Procédure d'évaluation des caractéristiques de déchets solides et de boues pompables*", published by the ministère de l'Environnement du Québec in 1985.

** Milligram (mg) of contaminants per litre (l) of liquid waste of leachate.

*** The standards of each category of contaminants shall be the sum total of all quantifiable values in excess of 0.01 mg/l, except for solid waste leachate of PCBs and PAHs for which the quantifiable value shall be 10% of the standard for the total.

**** Residues contaminated by these compounds shall be contaminated waste for which the maximum acceptable load is nil. The standard for each family of dioxins and furans, i.e., tetra, penta, hexa, hepta, and octo chloro compounds, shall be 1 500 picograms/litre.

Note: Compounds listed in Class 2 shall apply from the date fixed by proclamation of the Government.

NOVA SCOTIA

Dangerous Goods and Hazardous-wastes Management Act

APPENDIX II

SCHEDULE A

Column I TDG Classification	Column II Quantity in Kilograms or Liters as appropriate	Column III Reportable Quantities
1 Explosives	50	any quantity
2.1 Compressed Gas (flammable)	5,000*	100 L
2.2 Compressed Gas (non-corrosive, non-toxic, non-flammable)	10,000*	100 L
2.3 Compressed Gas (Toxic)	500*	any quantity
2.4 Compressed Gas (corrosive)	500*	any quantity
3.1 Flammable liquids	5,000	70 L
3.2 Flammable liquids	10,000	70 L
3.3 Flammable liquids	10,000	70 L
4.1 Flammable solids	10,000	1 Kg
4.2 Spontaneously combustible solids	1,000	1 Kg
4.3 Solids which react violently with water	1,000	1 Kg
5.1 Oxidizing Substances	1,000	Packing Group I & II, 1 Kg or 1 L, Packing Group III, 5 Kg or 5 L
5.2 Organic Peroxides	50	1 Kg or 1 L
6.1 Poisonous Substances	1,000	Packing Group I, 1 Kg or 1 L, Packing Group II or III, 5 Kg or 5 L
6.2 Infectious Substances	1,000	any quantity
7 Radioactives	any amount	any quantity
8 Corrosive Substances	1,000	5 Kg or 5 L
9.1 Miscellaneous	5,000	50 Kg except PCB's, PCB mixtures 500 g
9.2 Environmentally Hazardous	50	1 Kg or 1 L
9.3 Dangerous Waste	10,000	5 Kg or 5 L

*Total liquid volume capacity of container.
